luv.sarkari@gmail.com | github.com/LavSarkari | linkedin.com/in/lavsarkari

SUMMARY

B.Tech CSE (AI/ML) student with a background in cybersecurity and a growing focus on building practical software, automation tools, and AI-powered applications. My interest in understanding how systems work led me from security research and networking into developing projects involving intelligent scheduling, resource allocation, IoT surveillance, and security automation. I enjoy learning by building, experimenting with new technologies, and solving real-world problems through technology.

EDUCATION

B.Tech in Computer Science & Engineering (AI/ML) | SMS Lucknow, AKTU | 2025–2028
Diploma in Information Technology | CSJM Government Polytechnic | 2021–2024

TECHNICAL SKILLS

Programming: Python, Bash

Cybersecurity: Burp Suite, Nmap, Wireshark, Metasploit, OWASP Top 10, API Security
Systems & Networking: Linux, Windows, TCP/IP, DNS, HTTP/HTTPS, Networking Fundamentals, OS Installation & Configuration

Backend & Automation: FastAPI, REST APIs, Automation Workflows, API Integrations

AI & Data: LLM Applications, Prompt Engineering, Gemini API Integrations

Tools: Git, GitHub, VS Code, Postman, VirtualBox, Kali Linux

EXPERIENCE

Junior Pentester Intern | ASD Cyber Security (Remote) | Aug 2023

- Performed reconnaissance and vulnerability assessments.
 - Assisted in documenting findings and remediation recommendations.
 - Gained exposure to penetration testing methodologies and security workflows.
-

PROJECTS

EduGrid – Smart Timetable Scheduler (SIH 2025)

GitHub: github.com/LavSarkari/EduGrid

- Developed an automated timetable scheduling platform using Django, Python, Next.js, and TypeScript.
- Designed a priority-based scheduling algorithm and conflict prevention workflows.
- Implemented conflict detection for faculty schedules, room allocation, and student batches.
- Built role-based interfaces for administrators, HODs, and faculty members.

Sahaya – Intelligent Aid Coordination Platform

GitHub: <https://github.com/LavSarkari/project-sahaya>

- Built AI-assisted resource allocation and crisis coordination workflows.

- Implemented dashboards, volunteer workflows, and role-based access control.
- Integrated Firebase-based authentication and role-based access control.
- Contributed to real-time dashboards and volunteer management workflows.

PhishTrap – AI Anti-Scam Honeypot Agent

GitHub: <https://github.com/LavSarkari/phishtrap>

- Built an AI-powered system that engages suspected scammers and extracts intelligence.

ESP32-CAM Smart Surveillance System

GitHub: <https://github.com/LavSarkari/GarudUnc>

- Developed an IoT surveillance system with motion detection, image capture, and Telegram alerts.
- Integrated ESP32-CAM, sensors, and cloud-based notification workflows.

ASTRA – AI-Driven Threat Reconnaissance Agent

GitHub: <https://github.com/LavSarkari/astra>

- Built a security assessment platform for reconnaissance and vulnerability analysis.
-

ACHIEVEMENTS

- Smart India Hackathon 2025 Winner – EduGrid
 - Built and deployed multiple public technical projects across AI, cybersecurity, automation, and IoT
-

INTERESTS

- Chess
- Music
- Problem Solving
- Technology Exploration
