Summary

B.Tech CSE (AI/ML) student with a Diploma in Information Technology and a background in cybersecurity, networking, and software development. My curiosity about how systems work led me from security research into building practical software, automation tools, and AI-powered applications. I have developed projects involving intelligent scheduling, resource allocation, IoT surveillance, and security automation. I learn by building, experimenting with technology, and solving real-world problems.

Education

2025 – 2028	Computer Science & Engineering (AI/ML) B.Tech SMS Lucknow, AKTU
2021 – 2024	Information Technology Diploma CSJM Government Polytechnic

Technical Skills

PROGRAMMING

Python Bash

CYBERSECURITY

Burp Suite Nmap Wireshark Metasploit OWASP Top 10 API Security

SYSTEMS & NETWORKING

Linux Windows TCP/IP DNS HTTP/HTTPS Networking Fundamentals OS Installation & Configuration

BACKEND & AUTOMATION

FastAPI REST APIs Automation Workflows API Integrations

AI & DATA

LLM Applications Prompt Engineering Gemini API Integrations

TOOLS

Git GitHub VS Code Postman VirtualBox Kali Linux

AI-ASSISTED DEVELOPMENT

AI-Assisted Development AI-assisted software development AI-powered prototyping

Debugging with LLMs Rapid application development

Experience

08/2023 Remote	Junior Pentester Intern ASD Cyber Security - Performed reconnaissance and vulnerability assessments. - Assisted in documenting findings and remediation recommendations. - Gained exposure to penetration testing methodologies and security workflows.
-------------------	--

Projects

06/2026 – present Lucknow, India	Founding Technical Lead GyanAstra Ecosystem - Built the GyanAstra Ecosystem from the ground up, owning product strategy, architecture, development, and technical operations. - Designed and developed the organization's digital ecosystem, including web platforms,
-------------------------------------	--

Projects

academy infrastructure, administrative systems, APIs, database architecture, authentication, automated certificate generation and verification, email workflows, and deployment infrastructure.

- Responsible for translating business requirements into production-ready software while driving product development, technical decisions, UI/UX, automation, and overall technology execution.

11/2025 – 12/2025
Lucknow, India

Hackathon Project

EduGrid – Smart Timetable Scheduler (SIH 2025)

GitHub: github.com/LavSarkari/EduGrid

- Developed an automated timetable scheduling platform using Django, Python, Next.js, and TypeScript.
- Designed a priority-based scheduling algorithm and conflict prevention workflows.
- Implemented conflict detection for faculty schedules, room allocation, and student batches.
- Built role-based interfaces for administrators, HODs, and faculty members.

03/2026 – 05/2026
Lucknow, India

Team Lead

PhishTrap – AI Anti-Scam Honeypot Agent

GitHub: <https://github.com/LavSarkari/phishtrap>

- Built an AI-powered system that engages suspected scammers and extracts intelligence.

08/2025 – 11/2025
Lucknow, India

Team Lead

ASTRA – AI-Driven Threat Reconnaissance Agent

GitHub: <https://github.com/LavSarkari/astra>

- Built a security assessment platform for reconnaissance and vulnerability analysis.

Achievements

12/2025

Smart India Hackathon 2025 Winner

EduGrid · Problem Statement under Govt. of Jharkhand, IIT (ISM) Dhanbad
